# SPRINT-IV

Team ID	PNT2022TMID40462
Project Name	Smart Waste Management System for metropolitan cities

Configure the Node-RED flow to receive data from the IBM IoT platform and a web UI should be created in Node-RED
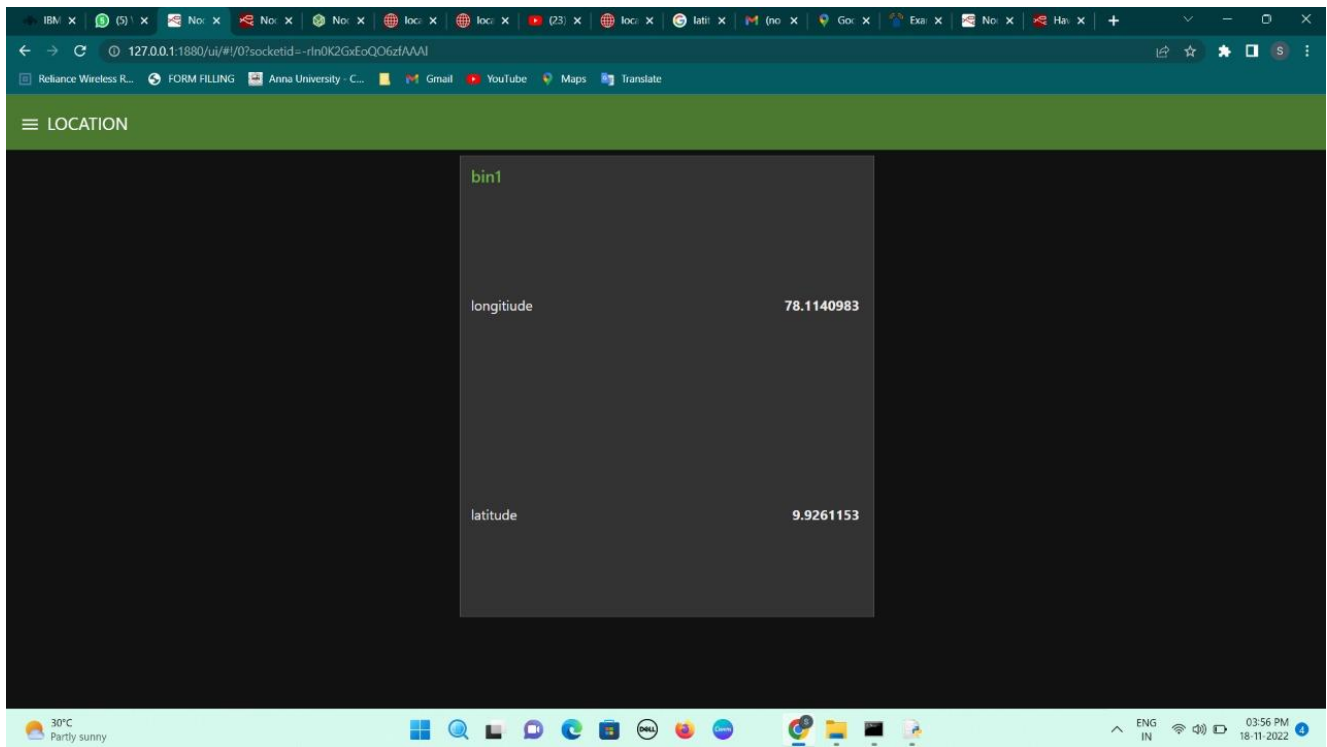

- ❖ Created a web ui ,we need to connect the Node-RED flow to receive data from the IBM IoT platform

❖ Web-ui application showing bin-level in the dashboard.

❖ A web application showing latitude and longitude of the bins located

❖ A web application is used to detect the live location of the bin
